Our Story

Shaybah™ began with a simple question:
If caring for an ageing loved one can be difficult even for healthcare professionals, what must it feel like for families navigating it alone?
Built on over fifteen years of experience in elderly, palliative, hospice, and long-term care, Shaybah was created to bring thoughtful, coordinated support closer to where older adults live: at the comfort of their residences.

Home-First Care

Care that can be received at home, should be received at home.

Coordinated Support

Coordinated medical and allied care through one connected system.

Dignity at the core

Care shaped by honour, compassion, transparency, and respect.

To us, Shaybah is more than a company.
It is a commitment.
To check in. To listen. To care. To honour.
Not as a formality. As family.

Care Designed Around Real Needs

What We Offer
